

## What is it?

Clear ledger is a payment solution based on blockchain technology. Companies big and small can have the ability to make, schedule, and pay to different crypto currency wallets quickly, easily, and affordably. Most importantly, all transactions are held on an irrefutable ledger. Transparency and immutable transaction data defines the disruptive power of blockchain.

Clear Ledger makes **paying commissions simple**. Any company has the ability to **schedule and pay to different crypto wallets quickly**.

## The Clear Ledger Advantage

**Fast enterprise payment distribution** in Bitcoin, alt coins, or fiat currencies.

**BTC send priority options for better transaction fee management**

**Easily make** commission, affiliate, bonus, or payroll payments.

**Safe and secure** payout deployment with the option of a multi-user approval requirement.

**An intuitive dashboard** with full reporting. Pertinent information such as total sent, total pending, fees, or failed transactions are clearly displayed.

**Preferred Wallet available** with a backoffice and transactional information.

Enterprise and User Bitcoin insurance policies **available in preferred wallet**.

All transaction reports **can be digitally notarized (hashed) on the blockchain**.

SMS and Email transaction alerts

Available **internationally**.
